Profile

Aspiring Software engineer with 1.5+ year of experience as a Control-M L1.5 administrator in enterprise batch processing and IT operations. Skilled in real-time monitoring, incident management, and automation of job recovery to improve operational stability and reduce resolution times. Seeking to apply technical expertise and problem-solving abilities to contribute to reliable, efficient, and innovative solutions in dynamic technology environments.

Education

2026 – Till date

Master of Computer Applications

Lovely Professional University, Punjab

APRIL 2024

Bachelor of Computer Science

Aditya Degree College, Andhra Pradesh, India – Percentage 86% (First Class with Distinction)

July 2021

Intermediate

Sri Chaitanya Junior College, Andhra Pradesh, India – Percentage 98% (First Class with Distinction)

May 2019

Matriculation

Minerva Public School, Andhra Pradesh, India – CGPA 9.8

Skills

Workload Automation • BMC Control-M

ITSM & Service Management • ServiceNow, ITIL

Language & Scripting • Python, Shell Scripting, PowerShell, Java, PHP

Operating Systems • Linux, Windows Server 2016

Database • SQL, Oracle

Other Technologies • Networking, MS Excel

Certifications

1. LTIMindtree Certified Cloud and Infra Services Professional.
2. Oracle Database Architecture Course and C# Basics for Beginners Course Certification by Udemy.
3. Microsoft Training Academy: Introduction to Programming using Python certification course.
4. Java and Oracle Database Foundation Course at Oracle Academy.
5. Completed the C Essentials certification course at the Cisco Networking Academy.

Professional Experience

FROM JANUARY 2025

Cloud and Infra Engineer – Projects (BMC- Control M Administrator – L 1.5) / LTM, Bangalore, Karnataka.

Client: Franklin Templeton Investments

Description: **Franklin Templeton Investments** is one of the world's largest asset management firms, headquartered in San Mateo, California, with over \$1.6 trillion in assets under management (AUM) as of 2025. It provides investment management, wealth management, and alternative investment services globally. The firm operates in more than 30 countries, serving both institutional and individual investors. Known for its long-term focus and diversified portfolio strategies, Franklin Templeton is recognized as a trusted leader in global financial services.

Role and Responsibilities

1. Supported enterprise-scale batch processing environments, ensuring operational stability of 30+ critical client applications.
2. Performed real-time monitoring, incident management, and job recovery to minimize downtime and improve reliability.
3. Automated batch job recovery and implemented production validations to streamline operations. Coordinated multi-team releases and actively participated in major incident management, supporting cross-functional teams.
4. Coordinated cross-team communication to restore Control-M agents during unplanned server outages outside patching windows, ensuring minimal disruption to batch operations.
5. Provided emergency weekend scheduling support by implementing temporary fixes during off-hours incidents, bridging the gap until L2 scheduling teams resumed during business hours — maintaining client SLAs with zero escalations.
6. Contributed to maintaining high availability and performance of mission-critical financial applications.

NOVEMBER 2024 – JANUARY 2025

Associate Trainee

LTM, Coimbatore, Tamil Nadu.

Role and Responsibilities

1. Windows Administration - Managed Active Directory, including user account creation, permission assignments, and access control.
2. Networking - Designed and configured network topologies using Cisco Packet Tracer, including routing and connectivity setups.
3. Linux - Essential Linux commands, including directory and partition creation, user management, and file permission modifications
4. PowerShell Scripting - Developed automation scripts for system tasks and administrative functions using PowerShell.
5. Azure DevOps - Gained foundational knowledge in Microsoft Azure services and DevOps practices.

Internships & Projects

Internship - Fake Profile Detection on Social Networking Sites Using Machine Learning and Python

FEBRUARY 2024 – APRIL 2024

Description:

1. Developed a machine learning system to detect fake Instagram accounts using Python.
2. Implemented data preprocessing and feature engineering on 12 profile features across 576 records.
3. Built and evaluated classification models using Random Forest and Decision Tree algorithms.
4. Achieved 93% test accuracy with Random Forest and 92% with Decision Tree.
5. Enhanced platform integrity and user security through automated detection.

Tools & Technologies: Python, Machine Learning, Random Forest Classifier, Decision Tree Classifier, Data Preprocessing, Feature Engineering, Model Evaluation

Internship –Webpage Login and Registration Application using Java and MySQL.

OCTOBER 2023 – DECEMBER 2023

Description:

1. Developed a responsive full-stack web application using Java, Spring Boot, and Angular/React.
2. Implemented user authentication, CRUD operations, and search functionality for efficient data management..
3. OOP concepts (inheritance, polymorphism, encapsulation, constructors, this keyword) to ensure clean and maintainable code.
4. Integrated multi-threading, exception handling, and CI/CD pipelines for reliability and performance.
5. Incorporated security measures including encryption and authentication protocols to safeguard sensitive data.

Tools & Technologies: Java, Spring Boot, Angular/React, MySQL/PostgreSQL, Apache/Nginx, OOP Concepts, Multi-threading, Exception Handling, CI/CD, Encryption & Authentication
